

Core System & Process Review.

WHAT IT IS

The Preos Core System & Process Review delves deep into your Workday setup to give you a comprehensive assessment of your core configuration, processes, data, support, and governance to ensure it is fully optimised and delivering a return on your investment.

It addresses common challenges and uncertainties organisations face while using Workday, providing you with a comprehensive health check of your tenant.

From there, we offer recommendations for improvement, making sure every aspect of your Workday setup is performing at its best so you can get the most out of Workday.

Scan to learn more about Preos Core System & Process Review

Our experts optimise Workday to align with your business priorities for maximum benefit.

A detailed health check of your tenant that uncovers areas of improvement so that you can use Workday functionality to its fullest.

Helps ensure smooth transitions during reorganisations, mergers, or acquisitions.

Feel confident that your tenant is secure and meeting audit requirements.

PREOS CASE STUDY

Rentokil Initial

Rentokil, a British FTSE100 company, acquired Terminix, a renowned US company listed on the NYSE. To ensure a seamless transition, Preos was engaged to conduct a Core System & Process Review.

OUR CORE SYSTEM & PROCESS REVIEW BEGINS WITH A TENANT HEALTH CHECK, WHICH

- Highlights what works well
- Identifies key opportunities for optimisation
- Uncovers issues that could have far-reaching implications
- Analyses pain points and the root cause

ASK YOURSELF

- Are you sure that your security model is meeting audit requirements?
- Do you have doubts about your configuration and data integrity?
- Have you fallen behind with Workday's latest features?
- Are you getting the user experience you expected?
- Are going through an organisational change, like a merger or acquisition, and feel unsure your tenant will cope?
- Did you go through a rapid deployment which left you with a lot unfinished?

BENEFITS

- Receive honest, pragmatic recommendations **tailored to your business priorities** and future plans.
- **Enjoy peace of mind** with our long-term solutions designed for cost predictability.
- We identify and resolve data challenges to give you **confidence in your Workday security model** and data integrity.
- Gain clear, actionable insights for **informed decision-making** aligned with your goals.
- Benefit from our **project management expertise** with Preos services, guaranteeing smooth integration of new processes for enduring success.

At Preos, we specialise in Workday optimisation. Our unrivalled expertise, dedicated team, and personalised account management ensure your long-term success. We upskill your team, address any inherited issues, and ensure that Workday continually meets the evolving needs of your business.

What does a Preos Core System & Process Review Look Like?

Discover

We meet with you to understand your stakeholders and business structures. We prioritise your desired outcomes and business benefits.

Assess

Assess the configuration of your tenant, including processes, security, data quality, and unadopted features.

Recommend

Report our findings with optimisation recommendations and a proposed project plan.

Optimise

Implement the prioritised recommendations using Workday's deployment methodology.
