New Module Implementation.

WHAT IT IS

Organisations are constantly evolving, driven by factors such as acquisitions, divestitures or global expansion. To stay ahead, your Workday configuration needs to evolve. That's where our New Module Implementation service comes in.

Preos implements new modules into your existing Workday set-up and into new geographies. We bring deep expertise and help you stay ahead.

WHY YOU MIGHT NEED IT

Whether adapting to acquisitions, expanding globally, or optimising processes, we ensure your Workday instance remains aligned.

Stop paying for unused modules and start integrating new entities effortlessly and streamlining your international operations.

Scan to learn more about Preos New Module Implementation.

We evaluate your licensing strategy to help replace external system functionalities with Workday, where possible, to maximise its capabilities and value.

We assist in incorporating all operational countries into Workday, streamlining international operations for uniformity across all locations.

Our unique DARO methodology (Discover, Analysis, Recommendations, Optimisation), combined with Workday's methodology, optimises the implementation process, reducing risk and cost while adding value to your organisation.

PREOS CASE STUDY

AVIS®

With the help of Preos, Avis implemented new modules to transform their recruitment process, reducing time-to-hire, improving candidate quality, and enhancing visibility into the talent pipeline.

ASK YOURSELF

- Are you paying for Workday modules you don't use?
- Have you made an acquisition that needs to be brought into Workday?
- Do you have countries that weren't part of your original deployment?
- Do you have licences coming up for renewal for systems providing functionality that could be provided by Workday?
- Has your organisation gone through a significant restructure that isn't reflected in Workday?

At Preos, we specialise in Workday optimisation. Our unrivalled expertise, dedicated team, and personalised account management ensure your long-term success. We upskill your team, address any inherited issues, and ensure that Workday continually meets the evolving needs of your business.

What does Preos New Module Implementation Look Like?

Discover

We dive into your Workday tenant to explore its core structures, current subscriptions, peripheral technology, and your strategic direction.

By understanding your unique needs, we lay the foundation for a successful implementation.

Assess

We assess needs against your existing systems, layer on existing renewal dates, aligning them with your strategic direction.

We identify areas where additional capability can be effectively leveraged within your current system, minimising unnecessary rework or implementation costs.

Recommend

We identify opportunities for synergy, consolidation and the optimal way to deploy new modules, geographies, or structures.

Optimise

We put our recommendations into action, following the trusted Workday methodology.

We prioritise the identified opportunities and implement them using industry best practices. Our highly experienced team ensures that the implementation aligns perfectly with your requirements and business processes.
