

# Roadmap Planning.

## WHAT IT IS

Get a clear view of your current and future technology capabilities with Preos Roadmap Planning. It is a valuable tool for establishing consensus on technology priorities and evaluating competing change requests.

With a clear sequence you can minimise transition effort and costs, and understand the impact of initiatives within and outside your technology ecosystem.

With a well-defined and approved roadmap, planning becomes straightforward, your stakeholders align better, technology gaps are addressed, and your return on investment is maximised.

## ROADMAP PLANNING WITH PREOS SHOWS YOU

- The volume of work required to enable your strategic goals.
- A calendar schedule highlighting key organisational activity, technology contractual dates, and innovation availability.
- Upcoming strategic technology initiatives, highlighting inter-dependencies with other enterprise systems in your organisation.

Scan to learn more about Preos Roadmap Planning.

We capture the current state of your technology ecosystem, establish governance and processes, and help you prioritise future Workday capabilities.

Enjoy effortless tracking and alignment of activities with our visual calendar - your key to optimal timing and milestone management.

Get a clear understanding of the work needed to reach your strategic goals.

## PREOS CASE STUDY

A major technology services company was breaking away from its parent organisation.

They needed to upgrade their HR technology systems. Preos stepped in to develop a roadmap that streamlined the HR technology by reducing the number of separate systems and integrations by over 65%.

## ASK YOURSELF

- Are you clear about your Workday strategy?
- Is there competing demand for new capability inside and outside of Workday?
- Does the demand exceed your delivery capacity?
- Is there significant tactical activity taking place that is not aligned with your wider Workday strategic direction?

We provide a structured approach to technology enhancement, aligning your strategies with technology capabilities, optimising planning and execution, and ensuring a holistic understanding of the impacts and dependencies of various initiatives.

## YOUR ROADMAP WILL EXAMINE COMMON PRESSURE POINTS, SUCH AS

- Contract deadline
- Platform foundations
- Business impacts
- Employee manager impacts
- Employee experience
- Current solution robustness
- Organisation readiness
- Compliance/pay impacts

## What does Roadmap Planning with Preos Look Like?

### Discover

Capture the current state of your technology ecosystem in detail.

### Assess

Integrate the roadmap methodology into your existing planning process, considering key strategic goals and organisational constraints.

### Recommend

Gain executive approval, budget sign-off, and support from key stakeholders by utilising the Workday roadmap, while also gaining contextual understanding.

### Optimise

Develop iterative plans for executing the roadmap delivery and implement the improvements using Workday's deployment methodology.
